

Plastic Bottle Classic

with Natural Latex Cherry
Medium Flow Teat

Care Instructions

- To ensure hygiene, clean before each use, wash in warm soapy water to remove all deposits.
- After washing, sterilise by boiling in water (for a maximum of 5 minutes), using baby bottle sterilising solution in accordance with instructions (for one hour only) or a microwave sterilising unit.
- When dry, store in a dry covered container.
- Always heat in microwave with lid off and check temperature before serving.
- Do **not** microwave Latex teats.
- Inspect before each use and pull the feeding teat in all directions, throw away at the first signs of damage or weakness.
- Do not leave a feeding teat in direct sunlight or heat, or leave in sterilising solution for longer than recommended, as this may weaken the teat.
- We recommend Latex teats be replaced every seven weeks for safety and hygiene.
- If teat is collapsing, simply try loosening (anticlockwise) the bottle collar slightly.

Complies to applicable
safety standards

FOR YOUR CHILD'S SAFETY AND HEALTH

WARNING

1. Always use this product with adult supervision
2. Never use feeding teats as a soother
3. Continuous and prolonged sucking of fluids will cause tooth decay
4. Always check food temperature before feeding
5. Heating in a microwave oven may produce localised high temperatures
6. Keep all components not in use, out of reach of children
7. Do not heat with the bottle sealed
8. Take extra care when microwave heating. Always stir heated food to ensure even heat distribution and test the temperature before serving
9. Teat produced from natural rubber Latex which may cause allergic reactions.
