

Easy-hold Slimline Bottle

with Silicone Cherry
Variable Flow Teat

happy baby®

Steadiflow®

Care Instructions

- To ensure hygiene, clean before each use, wash in warm soapy water to remove all deposits.
- After washing, sterilise by boiling in water (for a maximum of 5 minutes) or using a microwave steam sterilising unit.
- When dry, store in a dry covered container.
- As bottle will become softer during sterilising at high temperatures, avoid compressing bottles until cool.
- Do not leave a feeding teat in direct sunlight or heat, or leave in sterilising solution for longer than recommended, as this may weaken the teat.
- Inspect before each use and pull the feeding teat in all directions, throw away at the first signs of damage or weakness.
- We recommend silicone teats be replaced every seven weeks for safety and hygiene.
- If teat is collapsing, simply try loosening (anticlockwise) the bottle collar slightly as teats have micro air valves to equalise air pressure.

Complies to applicable
safety standards

FOR YOUR CHILD'S SAFETY AND HEALTH

WARNING

1. Always use this product with adult supervision
2. Never use feeding teats as a soother
3. Continuous and prolonged sucking of fluids will cause tooth decay
4. Always check food temperature before feeding
5. Heating in a microwave oven may produce localised high temperatures
6. Keep all components not in use, out of reach of children
